### Report Description

This report provides "all available details" from the Handler module and summarized information from the Waste Activity Monitoring module for the specified RCRA site. Details reported include basic site identification information; handler universe information; source record information including location and mailing address, contact person and address, NAICs, and regulated waste activities. For Biennial Report source records on or after the 2001 BR cycle, additional information reported includes quantity totals (generated, managed, shipped, received), and the top ten GM forms by quantity generated.

Information reported for the RCRA site may be limited by latest historical information and most recent Biennial Report cycle. The data is sorted by the most recent Received Date.

Note: Some data is suppressed if it is null or blank. See the Reports Library documentation in RCRAInfo Help for additional details.

**Notes**

Public: Item 9B. The facility became subject to post-closure on August 29, 1990 pursuant to an Administrative Order on Consent between Winston Mills, Inc. and NCDEQ (the "AOC"). The AOC states that the former location of a waste PCE tank (SWMU #10) was not clean closed and is deemed to have been closed as a landfill. Item 10.A.3. As per the current owner (Dyna-Diggr LLC), there is no active hazardous waste generation at the Facility; however, the Facility is considered a TSD due to SWMU #10. This submission is made in accordance with condition I.H.I of the final Hazardous Waste Permit for the Facility and the order entered by the Buncombe County Superior Court in 18 CVS 01731. To the extent required by NCDEQ, the permittees will be developing updated information and documents responsive to items 8-10 of the RCRA Part A permit application form but rely on the previously submitted materials in the interim.
